

# Overnight First Aid Kit and Med Kit Inventory

This is the content list of all First Aid Kits supplied by Arborwear and for locally managed Overnight First Aid Kits. Before each position, leaders will inventory their First Aid Kits to ensure they have a complete kit and to familiarize themselves with its contents. Additionally, on a regular basis throughout a position, leaders will inventory and restock their First Aid Kits. First Aid Kits are designed as a 30 day supply for a 7 person crew. If a crew is not carrying the First Aid Kit contents and quantities outlined below into the field, a local policy will be documented in a Local Operating Procedure approved by Risk and Safety. See the Frequently Asked Questions for instructions on writing a Local Operating Procedure for your branch's First Aid Kit program.

First Aid Kit Contents				
Item	Quant.	Out	Item	Quant. Out
